Introducing JWD

JWD is a specialist supplier of architectural fabrications for the commercial, industrial and domestic building markets. Particular emphasis is given to the manufacture and powder coating of rainwater and roofline systems, rainscreen cladding and architectural finishing detail in aluminium.

Established in 1982, we are recognised as one of the country's leading authorities in our field.

JWD operates from a modern, 22,000 sq ft premises comprising a state-of-the-art automated precision metal fabrications facility, a sophisticated track-fed powder coat factory with mechanical reciprocators, and a considerable warehousing unit, all conveniently located next to the motorway network in Hyde, Cheshire.

Our delivery and lead times are both reliable and flexible and, for those occasions where urgency is the number one priority, we offer an unrivalled, rapid turnaround service for extra peace of mind.

Our Passion for Delivering Unbeatable Service

JWD is a privately owned business and is managed by an energetic executive team who have many years' experience in the building and construction industry. We are driven by a desire to deliver competitively priced, quality goods, and service levels that far exceed our customers' expectations.

One of our foremost guiding principles is to provide added value to our clients, and the positive JWD experience can begin at any stage of a project, from initial site visits and estimating, to the production of samples and the completion of urgent requests. Technical support is provided throughout the installation stages.

Specialist Colour Technology Applied with Excellence

Powder Coating is carried out at JWD's specialist facility to world class standards.

Quality Assurance Verified by the World's Leading Coatings Provider

'Service First' is the name given to an elite network of industrial coaters in the UK, that has been audited and approved by Akzo Nobel quality assurance inspectors.

JWD became a 'Service First' associate in 2007. This quality mark heralds a sign that our powder coated products are supplied with the trust and confidence of one of the world leaders in colour technology and application.

JWD is also accredited with BS EN ISO 9001– a testament to the extreme importance placed by us on providing a quality product and exceptional service to our customers.

6892

Colour Specification

JWD maintains a stock of 135 routinely specified RAL, BS4800 and BS 381C colours which can be applied with a choice of finishes including matt, gloss and satin. Other colours can be arranged by consultation, according to the project and timescales.

Competitive Advantage through Quality Manufacture and Time Saving Solutions

A combination of colour application expertise, responsive manufacture and delivery, ongoing technical support, and competitive prices mean that we remain the first and only choice for our customers.

As a result, JWD is rapidly emerging as a significant UK market leader in the supply of polyester powder coated architectural aluminium for all types of building and construction projects.
